

## Texture agent L118

### Crocodile pattern agent

L118 is an acrylic surfactant, which can be added in L107 and L117 texture powder to make the texture higher and more consistent.

#### 1. Technical parameter

Appearance: white powder

Softening point: 90-110 °C

#### 2. Product characteristics

- Dry blend 0.2-0.4% L118 in L107 formulation, can produce a similar moire appearance.
- Dry blend 0.2-0.4% L118 in L107 formulation, make the crocodile pattern higher, more three-dimensional and consistent.

#### 3. Usage method

Dry blend 0.2-0.4% L118 when base powder coating have been finished.

#### 4. Packaging and storage

Kraft paper bag (polyethylene lining), 25Kg/bag. Store in a cool and dry place, away from fire and heat sources.
